

CONTENTS

01 Overview 1

What is retail? 1

What is analytics? 2

Who is this book for? 3

Why focus on retail? 3

Why am I making these suggestions? 3

How is this book organized? 4

02 Regression and factor analysis: an introduction 5

Introduction 5

Regression 101: What is regression? 7

Assumptions of classical linear regression 8

Why is regression important and why is it used? 9

Factor analysis 10

Exploratory vs. confirmatory factor analysis 11

Using factor analysis 11

Conclusion 13

03 Retail: industry uniqueness 15

Introduction to retail 15

Brief history of retail 16

Retail analytics 18

Orientation: because retail is... this book is... 19

Retail culture and corporate agility 22

Conclusion 22

04 Retail: data uniqueness 24

Which CRM systems are used? 24

Sources of retail data 25

What is Big Data? 27

Is it important? 29

What does it mean for analytics? For strategy?	29
Why is it important?	30
Surviving the Big Data panic	30
Big Data analytics	32
Conclusion	33

INTERLUDE 35

05 Understanding and estimating demand 37

Introduction	38
Business objective	39
Using ordinary regression to estimate demand	39
Properties of estimators	40
A note on time series data: autocorrelation	42
Dummy variables	44
Business case	44
Conclusion	50

06 Price elasticity and discounts 52

Introduction to elasticity	53
Modelling elasticity	56
Business case	62
Conclusion	69

07 Valuing marketing communications (marcomm) 71

Business case	73
Conclusion	78

08 Forecasting future demand 80

Autocorrelation	81
Dummy variables and seasonality	82
Business case	83
Conclusion	88

09	Targeting the right customers	90
	Introduction	90
	Business case	91
	Results applied to the model	92
	A brief procedural note	98
	Variable diagnostics	98
	Conclusion	99
10	Maximizing the impact of mailing	100
	Introduction	100
	Lift charts	101
	Scoring the database with probability formula	102
	Conclusion	105
11	The benefits of product bundling	106
	What is a market basket?	107
	How is it usually done?	107
	Logistic regression	108
	How to estimate/predict the market basket	108
	Business case	109
	Conclusion	112
12	Estimating time of purchase	113
	Introduction	113
	Conceptual overview of survival analysis	114
	More about survival analysis	115
	A procedure suggestion and pseudo-fit	118
	Business case	118
	Model output and interpretation	120
	Conclusion	122
13	Investigating the time of product purchase	124
	Competing risks	125
	Conclusion	126

14	Increasing customer lifetime value	127
	Descriptive analysis	128
	Predictive analysis	129
	Introduction to tobit analysis	131
	Business case	132
	Conclusion	139
15	Modelling counts (transactions)	141
	Business case	142
	Conclusion	145
16	Quantifying complexity of customer behaviour	146
	Introduction	147
	What are simultaneous equations?	147
	Why go to the trouble to use simultaneous equations?	148
	Business case	151
	A brief note on missing value imputation	160
	Conclusion	161
17	Designing effective loyalty programmes	162
	Introduction to loyalty	163
	Is there a range or spectrum of loyalty?	164
	What are the 3Rs of loyalty?	164
	Why design a programme with earn–burn measures?	165
	Business case	170
	Conclusion	172
18	Identifying loyal customers	174
	Structural equation modelling (SEM)	174
	Business case	179
	Conclusion	184

19	Introduction to segmentation	185
	Overview	186
	Introduction to segmentation	186
	What is segmentation? What is a segment?	186
	Strategic uses of segmentation	187
	A priori or not?	189
	Conceptual process	190
	Conclusion	196
20	Tools for successful segmentation	197
	Overview	197
	Metrics of successful segmentation	198
	General analytic techniques	198
	CHAID	199
	Conclusion	206
21	Drawing insights from segmentation	208
	Business case	208
	Analytics	212
	Comments/details on individual segments	220
	Conclusion	225
22	Creating targeted messages	226
	Overview	226
	Conclusion	229
23	RFM vs. segmentation	231
	Introduction	232
	What is RFM?	232
	What is behavioural segmentation?	234
	What does behavioural segmentation provide that RFM does not?	236
	Conclusion	237

24 Marketing strategy: customers not competitors 238

Customer-centricity 238

Conclusion 241
