Preface	xxxiii
Introduction	xxxiv
Walkthrough of textbook features	xxxvi
Walkthrough of the student and tutor support sites	xxxviii
PART 1 FROM FIRST IDEAS TO POSSIBLE TOPICS	1
Chapter 1 Practical business research: an overview	3
Sheila Cameron	
What is practical business research?	4
Different forms of business research	6
What does theory mean in practical business research?	9
The purposes theory can serve	12
The importance of evidence	14
Understanding the research process	16
Distinguishing bad research from good	23
The structure of this book, and its optimal use	26
Chapter 2 The complexities of business research	31
Sheila Cameron	
Complex issues, wickend problems, and messes	32
The complexities of doing business research	39
Representing complexity	44
The complexities of knowing	50
The complexities of personal learning and development	60
Chapter 3 The investigative process	65
Sheila Cameron	
Research, inquiry or investigation?	66
Data, information or evidence?	70
Research purposes	72
Research perspectives and choices	73
Deductive or inductive research?	74
Fixed or flexible design?	80
A meeing of logics	82
Evaluation research	95
Chapter 4 Stakeholder, power and ethics	101
Deborah Price	
Identifying stakeholder interests	102
Stakeholder tensions	105
Stakeholder power	107
Analysing stakeholders	111

	Stakeholders' role, stake, risk and opportunity	113
	The stakeholder engagement plan	115
	Ethics	117
Chapter 5	Considering possible topics	131
Sheila Cameron	Clarifying your objectives	132
	Exploring academic requirements	137
	Exploring opportunities	137
	Considerations of data and approach	139
	Assessing your options	140
PART 2 TOWARDS A RESEARCH PROPOSAL		143
Chapter 6	Exploring the literature	145
Deborah Price	Why is literature research important?	146
	Accessing literature and information	148
	The advantages and disadvantages of different forms of literature	154
	Getting started	160
	Choosing what to read	161
	Scanning and skimming techniques	163
	Note-taking	167
	Organising your notes	170
Chapter 7	Writing a literature review	175
Deborah Price	The characteristics of a literature review	176
	Referencing in your literature review	178
	Structuring your literature review	180
	Sample extracts of literary reviews	184
Chapter 8	Research questions and purposes	189
Deborah Price	What is a top-level research question or purpose?	190
	Developing your ideas	192
	Drafting your research purpose/question	196
	Research objectives	201
	What can go wrong?	202
	Writing hypotheses	203
Chapter 9	Data, evidence and sampling	207
Sheila Cameron	Types of data	208
	Telling good data from bad	215
	Seeking, finding and discarding data, information and/or evidence	220
	Sampling	224
	Drawing conclusions from data	233
Chapter 10	Choosing a research method	241
Deborah Price	Thinking about your research	242
	Common approaches to business research	245
	Data-gathering techniques	252
	Mixing research methods	256

Chapter 11	Crafting a research proposal	263
Sheila Cameron	Preparing your arguments	264
	Crafting your proposal	274
PART 3 DATA COLLECTION		283
Chapter 12	Producing a research project from secondary data	285
Deborah Price	Types of secondary-data-based projects	286
	Finding a focus	289
	Considering research methods	292
	Using findings as evidence	295
	The strengths and weaknesses of using only secondary data	296
Chapter 13	Case study research	301
Deborah Price	What is a case study approach?	302
	Choosing a case study approach	306
	Undertaking case study research	308
	The strengths and limitations of a case study approach to research	312
Chapter 14	Action-oriented research and Action Research	315
Sheila Cameron	Action-oriented research	316
	The characteristics of Action Research	319
	The role of reflection in Action Research	322
	Evaluating an Action Research approach	326
	Lessons for action-oriented research	328
Chapter 15	Questionnaires	333
Deborah Price	Questionnaires and their uses	334
	Producing questionnaires	338
	Types of question	342
	Closed questions	346
	Visual design elements	351
	Maximising response rates	354
	Electronic questionnaires	358
Chapter 16	Interviews	361
Sheila Cameron	Interviews for different purposes	362
	The advantages and disadvantages of interviews	365
	Different interview structures	370
	Designing your interview	374
	Telephone or other 'remote' interviews	381
	Capturing data from interviews	382
	Interpersonal skills	386
	Ethical issues	388
	Practical concerns	389
Chapter 17	Focus groups and workshops	395
Sheila Cameron	The relative advantages of focus groups	396
	Running effective focus groups	398

	Workshops as research method	402
	Assessing data from focus groups and workshops	403
	Ethical considerations	404
PART 4 DATA ANALYSIS		407
Chapter 18	Grounded Theory	409
Deborah Price	Understanding Grounded Theory	410
	Starting with your question	412
	The coding process	417
	The strengths and limitations of a Grounded Theory approach	422
Chapter 19	Content analysis	427
Deborah Price	Understanding content analysis	428
	When to use content analysis	430
	The coding process	432
	The analytical process	437
	Drawing conclusions from content analysis	437
	The strengths and limitations of content analysis	438
Chapter 20	Representing quantitative data	441
Sheila Cameron	Different forms of data	442
	Ways of summarising data numerically	445
	Graphical representations	451
Chapter 21	Inferential statistical analysis	463
Sheila Cameron	Probability and statistical significance	464
	Distributions and their importance	471
	Statistics for estimating population values	477
	Choosing a statistical test	482
	Statistics for differences	484
	Statistics for associations	489
	Lines of best fit	496
Chapter 22	Drawing valid conclusions	501
Deborah Price	Characterising conclusions	502
	Writing valid research conclusions	503
	Mistakes made in conclusions	510
	The characteristics of good conclusions	512
PART 5 ESSENTIAL RESEARCH SKILLS		513
Chapter 23	Managing the project	515
Deborah Price	Elements of project management	516
	Project definition	518
	Task and resource analysis	522
	Project planning	523
	Project control	529

Chapter 24	Managing client relationships	533
Sheila Cameron	Client relationships: the importance and the challenge	534
	Relationships at different stages in a consultancy project	535
	Building a good relationship	540
Chapter 25	Learning and reflection	549
Sheila Cameron	Action planning for learning	550
	The role of reflection in learning	552
	Effective reflection	555
	Capturing learning by reflection	557
	The reflections section of a dissertation	560
Chapter 26	Writing about research	565
Deborah Price	The importance of on-going clear communication	566
	Key elements in successful communication	567
	Referencing	572
	Starting your writing	575
	Producing your report	577
	Alternative report structures	582
	The contents of your report	587
	The presentation of your report	590
	References/Bibliography	595
	Index	604
