How to Use this book xxi

PART ONE Knowledge architecture around collaboration (the jewel in the crown) 1

01 Introduction: The rationale for collaborative business practices across supply chains and why collaboration can be the jewel in the crown 3

02 Collaborative arrangements: Different supply chain perspectives, drivers and interdependencies 23

Customer profiling 28

Contractor landscape analysis for awareness of interdependencies
across the supply chain 31

03 Raising the game – the CRAFT 8 Stage Life Cycle Model and ISO 44001: The evolution and emergence of a new global standard for collaborative working 37

Trends in organizational thinking and the pace of change 38

How to collaborate 38

Stage 1: Operational awareness 41

Stage 2: Knowledge 43

Stage 3: Internal assessment 44

Stage 4: Partner selection 46

Stage 5: Working together 47

Stage 6: Value creation 50

Stage 7: Staying together 50

Stage 8: Exit strategy activation 52

Conclusion 54

04 The importance of stakeholder engagement in harnessing the benefits of collaborative working practices 55

Step 1: Identify stakeholders 66

Step 2: Analyse issues and reputation 70

Step 3: Set engagement objectives 71

Step 4: Action plan for engagement 72

Step 5: Evaluation plan 74

The tools and templates 75

Conclusion 86

05 Pan-industry supply chain collaboration: An exemplar of solutions developed by and for the industry 89

Industry context 89

The application of good principles to address stormy waters 99

Stage 1: Planning 101

Stage 2: Contracting 102

Stage 3: Perform and pay 129

Conclusion 129

06 Commercial risk and pricing considerations associated with collaborative versus traditional contracting arrangements 131

Limitation of risk associated with different contract pricing or remuneration regimes 135

Understanding contractor or supplier risk 138

The joint alliance steering group concept versus more adversarial contractual provisions to safeguard against failure or default 139

PART TWO Case studies of exemplar historical collaborative practice 143

07 Case study 1: The Team Marine story – putting logic back into logistics 145

Background history 146

Why change? 146

The facts 148
Obstacles encountered and how they were overcome 150
Cost allocation and management mechanisms jointly developed,
and the benefits of Team Marine 151
Scale of combined activity, and the benefits and results achieved
under Team Marine 152
Why the Team Marine initiative succeeded: Core shared belief
system and principles 153
Concluding reflections 154

08 Case study 2: Captain – the impossible dream 157

Background history 157
The post-licence award challenge 158
Resilience and the development of new technology 159
Unconventional and unorthodox project route achieved through
collaboration 160
Formation of a new collaborative contractor consortium 161
A novel fast track project approach 161
Piecing together the jigsaw 163
Conclusion 164

09 Case study 3: Building supply chain functional excellence through collaboration with internal partners 165

Background 166
A new style of leadership 167
Initial diagnostic 168
Structured methodology 169
Conclusion 186

10 Case study 4: Envoi – value creation through collaborative outsourcing of acquisition and divestment in the upstream E&P sector 187

A&D statistics 188
The keys to successful specialist consultant collaboration 189
The value of specialist consultants 191
Project development and execution process 192
A&D outsourcing collaboration: Case studies 194
The keys to successful A&D outsource collaboration: Plan and
prepare properly 200

The reasons for failure: Poor and untimely planning and preparation 202

The facts about project marketing failure 203

PART THREE Case studies of exemplar collaborative practice in play or evolving 205

11 Case study 5: Humanitarian relief – Food for the Hungry: daring to be different through collaborative innovation 207

Background 207

Ground transportation and rail needs 208

Governance, compliance and judicial challenges 209

The humanitarian needs situation in the DRC 210

Collaborative partnering for commodities planning, forecasting and funding 211

Collaboration in warehousing 217

Collaboration in commodity distribution 217

Conclusion 219

12 Case study 6: The Oil and Gas Technology Centre 223

Background history to the formation of the OGTC 223

Creating value: The OGTC'S first year – one of tangible delivery 224

A snapshot of some of the innovative ideas being worked by the OGTC 226

Conclusion 229

Useful links 229

13 Case study 7: All together now – improvements in collaboration in the pharmaceutical and biomedical life science sectors 231

Background, reach and impact of initiative 232

Perceived forward challenges and formation of a joint industry team 233

Scope of work and boundaries 233

Methodology 233

Results 235

Conclusion 239

14 Case study 8: The emergence of digital procurement in the IT sector 241

The whole is greater than the sum of its parts 241

Heritage value proposition 242

Growth through collaborative innovation and automation 243

KnowledgeBus and KnowledgeKube: The basis for an integrated cutting-edge supply chain 245

Progora digital procurement solution – a faster, easier digital path to procurement? 246

Features of the technology 247

Transformation and opportunities created by the technology 249

Public sector practice 251

Conclusion 254
