Introduction: shippers, carriers and the other participants in maritime business – a clear need for better relationships 1

Rolf Neise

PART ONE The maritime container transportation chain (MCTC) 9

01 Global container trade – the past and the future 11

Eyden Samunderu

Introduction 11

The scope of globalization of markets 14

Container shipping 16

Trade routes 17

Container logistics and global production networks –
global trends 21

Conclusion 27

References 28

02 The maritime container transportation chain (MCTC) 31

Rolf Neise

Introduction 31

The participants 33

Shipping lines 40

Port operators 52

Equipment owner 58
 Sea freight forwarders 61
 The network 63
 Global shipping networks 63
 Ports 70
 Container ships 73
 Special considerations 78
 Conclusion 84
 References 86

03 History and usage of containers in logistics and beyond 92

Hildegard Buschmann

History of containerization 92
 Converted container – the hidden life of a sea container 97
 Concluding remarks 108
 References 109

PART TWO The effective management of the MCTC 113

04 Empty container logistics – a prospective local approach in the Port of Hamburg 115

Marco Hofmann and Lillian Schmidt

Introduction 115
 The Port of Hamburg – development and challenges 117
 Empty container logistics 119
 Regional structures in sea traffic 125
 Stakeholders in the empty container transport chain 127
 The current process of empty container logistics 129
 The idea 130
 The software behind it 131
 What partners will achieve with the project 131
 Project status and the way forward 134
 Cost structure in empty container logistics business 136
 Conclusion 138
 References 139

- 05 Port and terminal operations 140**
Maik Ullrich and Michael Baumert
Introduction 140
Container terminal optimization 144
Finding the right strategy for container terminal optimization 164
References 167
- 06 Multimodal transport of mining equipment from Germany to Kazakhstan 169**
Zhanat Abdugalimov, Anthony Beresford and Stephen Pettit
Introduction 169
Intermodal/multimodal transport concept 170
Import of mining equipment and infrastructure development 171
Analysis 177
Discussion 193
Conclusion 197
References 197
- 07 Cooperation and collaboration between shipping lines 202**
Alan Robertson
Introduction 202
Fundamentals of cooperation – assets and trading 202
Cooperation in practice 208
Cooperation and mergers and acquisitions 212
Conclusion 213
- 08 Collaboration in the container shipping industry – new technologies enabling collaboration between shipping lines and terminals 214**
Robert Inchausti
Introduction: why collaboration in the container shipping industry? 214
Why stowage collaboration? 215
What technology is available to facilitate collaboration? 220

Conclusion: how can collaboration benefit other supply chain stakeholders? 223

References 224

PART THREE The integration of the MCTC into global supply chain management 225

09 Global SCM and resulting shippers' requirements 227

Rolf Neise

Introduction 227

Global supply chain management 228

Logistics processes 231

Procurement processes: transport procurement 239

Planning processes 250

Shippers' requirements 253

Conclusion 260

References 261

Best practice examples 262

The solution 264

10 Advanced benchmarking and market intelligence – a key instrument in optimizing container logistics procurement 278

Björn Klippel

Benchmarking: objectives and definition 278

Container logistics benchmarking: purposes and uses 281

Scope and objects 290

Approach and methodology 298

Quality of information 306

Key lessons and best practices 310

Reference 312

11 Formation of a shipper council to improve data quality and share best practices 313

Gregory Kefer

The emergence of B2B hubs and marketplaces 313

Technology 'co-opetition' in container shipping 314

The emergence of the GT Nexus Shipper Council 315

Steady and significant improvements in data quality	317
Collaboration benefits go beyond data quality	320
Conclusion	321

12 IoT solutions in maritime logistics: transports of perishable dairy goods 323

Stefan Viehmann and Hans-Thoralf Bieber

Introduction: IoT solutions	323
From general supply chain management to integrating IoT solutions	324
Customer case study: transports of perishable dairy goods	335
Preconditions to install such an IoT solution portfolio	337
Outlook	344

13 The service-dominant perspective to create value in the maritime business 346

Qeys Kamran and Julian Scheu

Introduction	346
The need for a new logic	347
Resources, goods and services	349
The concept of value co-creation	350
The conception of value	352
The relationship of the different value concepts	353
Different views on value co-creation	356
Managerial implications	359
The S-D concept in the maritime container transport chain	361
Conclusion	369
References	370

14 Industry trends and opportunities 374

Rolf Neise

Introduction	374
Shippers and the maritime container transport chain	374
Strategies and solutions to improve the situation	390
Conclusion	397
