The three flows	102
Linkages and dependences	105
The importance of managing cash flow	109
Functional integration	113
Summary	116
References	116
Study question	118
Study solution	119

PART TWO The current practice 125

04 The concept – A case for supply chain finance 127

Introduction	128
Key definitions and general options	135
Operating modes of the basic approaches	141
Scientific background	145
Transition stages	147
Network financing philosophy	149
Economics	158

Win–win situations 162
Summary 171
References 172
Study questions 175

05 The ecosystem – Who is involved in supply chain finance? 179

Introduction 180
Users of SCF 183
Logistics service providers 190
Financial service providers 193
SCF platform providers 201
Consultants 207
Advisers 208
Industry and professional associations 209
Governments and other public bodies 213
Academia 217
Summary 218
References 219
Study question 224

06 The value proposition – Solutions for supply chain finance 225

Introduction 226
Accounts payable solutions 228
Accounts receivable solutions 238
Inventory financing 244
Other solutions 251
Business case 251
Selection and decision trees 265
Supply chain programmes with an SCF impact 270
Summary 271
References 279

07 The implementation – Bringing supply chain finance programmes to life 281

Introduction 282
Typical pitfalls 283
Implementation guidelines 285

Risk reduction approaches	314
Summary	316
References	317
Study question	318

PART THREE The future 319
