About the authors xi

Preface xv

Acknowledgements xvii

01 Pain of the chain 1

PART I Linking blockchain to supply networks 17

02 Blocked and loaded 19

The chain of events 21

Using blockchain to show your roots 27

Where can I buy some blocks? 31

03 The power of hype 37

Just a database 39

From hype to concrete 46

04 Barriers to adopting blockchain 57

Identifying hurdles 58

Summarizing the barriers 59

The digital divide 72

Burgers and barriers 73

Unanswered questions 74

PART II Supply ecosystems 77

05 **Networking supply chains** 79

Embedding new ideas 83

Evolving dynamics 89

Enabling versatile information flows 100

Finding structural holes 101

06 **Sustainable supply chain management** 107**07** **Inventory management** 113**08** **Demand management** 123**09** **Supply management** 133**10** **Transportation management** 145**PART III** What's the use case for blockchain? 155

11 **Lorning from RFID** 157**12** **Make the case** 165

Before the business case 168

13 **Load up the bus** 181

Internal players 182

Business or supply chain partners 183

Consultants 189

14 **Get the party started** 195

Stay out of the weeds 198

Then what? 199

15 Enter the learning loop 201

Kill it 202

Change it 203

Implement it 203

Scale it 205

16 Off the chain 211

Where to begin? 212

Functional improvements 214

What's next? 216

Appendix: Where's your highlighter? 219
