 - Auditing: from gaining to maintaining certification 112
 - Does ISO 9001 deliver? 114
 - In summary 115
 - Key terms 116
 - Notes 117
- 05 Operational excellence (OpEx) 118**
- Introduction 119
 - The modern world 120
 - Manufacturing: the options 121
 - Modern approaches to manufacturing operational excellence (OpEx) 121
 - The Internet of Things 135
 - In summary 139

Further reading 142

Notes 142

06 Environmental management systems standards (EMS) 144

Introduction 145

What is an EMS? 146

Key standards 149

ISO 14001 logic and structure 155

The features of ISO 14001 158

Distinguishing features of ISO 14001: environmental aspects and impacts 161

Distinguishing features of ISO 14001: emergency preparedness 165

EMS implementation 166

ISO 14001 certification 168

Benefits of being ISO 14001 certified 170

In summary 171

Further reading 173

Notes 173

07 Occupational health and safety management systems 175

Introduction 176

ISO view of occupational health and safety 177

History of occupational health and safety standards 178

ISO 45001: an integrated management system 179

The trilogy 191

In summary 192

Further reading 194

Notes 194

08 Information security management 195

Information security 196

Information security management systems (ISMS) 199

Cyber security certification and standardization 202

Security standards 203

ITIL and ISO 20000 series 210

CMMI Institute 213

In summary 213

Further reading 215

Notes 215

- 09 Business continuity and uninterrupted product flow 216**
Responsive and resilient manufacturing 217
The standard and its features 220
The standard in more detail 222
The standard in summary 229
Further reading 231
Notes 231
- 10 Supply chain management, design and international standards 233**
Introduction 233
What is a supply chain and why is it important? 234
From purchasing to supply chain 238
Supplier management and the design process 243
The supply chain and international management standards 245
In summary 249
Notes 250
- 11 Developing a learning organization and auditing 251**
What is a learning organization and why is it important? 252
ISO standards and the learning organization 255
The importance of auditing 256
The outcomes of an audit 259
Auditing and ISO standards 261
The process of an audit 265
Audits and learning 266
In summary 266
Further reading 267
Notes 268
- 12 Leadership and international standards 269**
Introduction 269
Leadership and management 270
Leadership over time 272
Generic leadership types 273
Followers and followership 275
Features of the leadership process 276
Leadership focus: staff and task 278

Leadership and international management standards 281
In summary 286
Further reading 288
Notes 288

13 Implementation, resistance to change and sustaining change 289

Innovation and change 290
Organizational change and transformation 292
Enabling change – reducing resistance 294
Change management models 295
Sustaining change 309
In summary 311
Further reading 312
Notes 313

14 Conclusions and looking forwards 315

The effectiveness of management standards for business 316
A sand cone of standards? 320
Final words 322
Note 323

Appendix: Further help for professional and university students 324

Index 329
