

CONTENTS

Preface ix

About the author xi

- 01 Defining packaging logistics 1**
 - Definition of packaging logistics 2
 - The levels of a packaging system 7
 - Systems approach in packaging logistics 10
 - The role of supply-chain integration for packaging logistics 13
 - Summary 16

- 02 Packaging performance in supply chains 18**
 - Packaging as a value generator and enabler of cost efficiency 18
 - Key issues in evaluating supply-chain performance of packaging 19
 - Standardization 21
 - Packaging postponement 23
 - Summary 25

- 03 Packaging performance methodology 27**
 - Organizational challenges to address for high packaging logistics performance 41
 - Summary 42

- 04 Managing the environmental impact of packaging logistics 44**
 - Packaging in environmentally effective and efficient logistics 45
 - Environmental impact of direct and indirect packaging effects 47
 - Packaging material 53
 - Product waste 58
 - Packaging impacts on logistics and transport efficiency 60
 - Summary 63

- 05 Managing packaging waste 65**
 - Packaging waste characteristics 65
 - Packaging waste locations 66

	Waste collection systems for packaging	69
	Managing packaging waste	71
	Summary	71
06	Managing ICT features of packaging	73
	Track and trace capabilities enable management	73
	The impact of ICT in packaging on logistics performance	74
	Track and trace capabilities of packaging	78
	Essential decision support	81
	Implementing track and trace capabilities in packaging	83
	Summary	85
07	Reusable packaging systems	87
	Characteristics of reusable packaging systems	87
	Types of reusable containers	90
	Control methods for reusable packaging systems	92
	Summary	97
08	Industrial packaging evaluation	99
	System boundaries for industrial packaging applications	100
	Cost and CO ₂ factors for evaluation of industrial packaging systems	101
	Guidelines for developing a packaging evaluation model	107
	Proposed development steps	108
	Summary	110
09	Decision support for industrial packaging	112
	Decision-support areas from industrial packaging evaluation	112
	Selection principles for industrial packaging	115
	Sourcing and production strategy decision principles	115
	Illustrations of industrial packaging principles	119
	Summary	126
10	Organizing packaging development	128
	Organization of packaging logistics in companies	128
	Four generic structures for organizing packaging development	129
	Centralized and decentralized organization for packaging development	131

Function- and project-based organization for packaging
development 133
Concurrent product and packaging development 136
Summary 137

11 Packaging innovation capability 139

Packaging concept innovation processes 139
Packaging concept development 141
Quality of the packaging innovation capability 147
Summary 150

**12 Managing packaging logistics in e-commerce
channels 152**

Cost and environmental impacts of packaging in e-commerce 152
Delivery alternatives in e-commerce 154
Effects of e-commerce supply chains on the packaging system 156
Summary 164

**13 Managing packaging logistics in developing
countries 165**

Packaging features requiring special attention in developing
countries 165
Summary 175
