CONTENTS

Introduction 1

- Structure of the book 6
- Management and strategy as tools of organizational functionality 8
- The contemporary undertaking of strategic thought 13
- Practical applicability 23
- Scientific theoretical positioning 24
- Strategic management and competitive strategy – an advanced introduction 27
- What robust strategy models can accomplish 35
- References 36

01 Michael Porter – the founder of competitive strategy 42

- Porter's generic strategies 43
- Porter's value chain model 46
- Porter's five forces model (FFM) 48
- References 100

02 A treatise of cybernetics, system sciences and complexity sciences 109

- Systems theory and its relevance for strategic management 116
- System methodology as a foundation of organizational steering in complex environments 122
- System dynamics and its implications on strategy 127
- Designing a grand strategy for management 145
- Recursion – the foundational principle of organizational complexity 156
- Self-organization in social productive systems 160
- Cybernetics – the science of effective organization 165
- Autopoiesis and social systems 188
- Artificial intelligence and organizational behaviour 191
- Understanding and integration of 'fuzzy logic' for strategic thought 203
- Understanding complexity via the lenses of cybernetics 208

The viable system model (VSM)	214
Second-order cybernetics	237
The team syntegety model (TSM)	243
Radical constructivism and its implications for strategic management	246
Complex adaptive systems (CAS)	251
Understanding chaos theory and economics, management and strategy	259
References	273

03 Introducing the six forces model 286

Complexity and strategy	293
In-depth reflections on organizational structure – the VSM and FFM, a necessary synergy	296
References	321

04 Global value chain management strategies and models for competitive advantage 334

<i>Co-authored with Dr Rolf Niese</i>	334
Introduction – co-authored with Lukas-Arved Eiben, MBA	334
The historical development: from transportation to supply chain	335
Supply chain: current state of research and approaches	338
Introduction to Porter's value chain theory	343
A critical review of Porter's VC model and his concept of sustainable competitive advantage	347
Global value chains: the basic model	350
Current trends and predictions about the development of global value chains	354
Supply chain research and global value chains: current state, criticism and approaches	358
The missing link between existing research and hands-on models	367
Conclusion and outlook	371
Notes	373
References	373

05 Economic dimension of the six forces model and practical implications 378

Co-authored with Maryam Sezavar, MIM 378

A background to the contemporary business environment of Iran 378

Sanctions and MNCs in Iran 380

Applying the SFM in Iran 380

References 383

Conclusion 384

Corroborative outcomes of theoretical analysis and complexity modelling 385

Exemplary application areas and recommendations 386

References 387

Index 388
