ACKNOWLEDGEMENTS

So many conversations have inspired the writing of this book that it is impossible to list everyone here. However, I'd like to extend particular thanks to my interviewees, Teana Baker-Taylor, Richard Crook, Eden Dhaliwal, Helen Disney, Damien Ducourty, Ian Grigg, Barney Mannerings and Colin Platt for their time and insight. Thanks to Danny Weston, Raionmond Mirza and Martin Jee for conversations and feedback that informed the structure and content of the book.

The world of Bitcoin and cryptocurrency has introduced me to literally hundreds of amazing people whom I would not otherwise have met, many of whom have become friends. So thanks go to all Bitcoiners I have met in Berlin and London (and on Twitter!), especially Anna Kurth, Chris Davis, Magda, Neha M, Nind, Ali, Su, Michele, Ksenya and the Proof of Work tribe. Thanks to my CountMyCrypto co-conspirator Bruce Thomas, to YoperSouls Enrico Mariotti, Massimiliano Gerardi and Gianluigi Davassi for our adventures with Yope and Mamoru, and to my amazing colleagues at B9Lab.

Thank you to Amy Minshull and Heather Wood at Kogan Page for believing in the book and helping me at every step. And a heartfelt thanks to all my friends who do not necessarily share my obsession with these topics but kindly indulged me and listened to me all the same, especially Clare and Amelia.

Finally, I would like to thank the mysterious Satoshi Nakamoto, for giving me the reason to write this book.
