## **PART ONE** Projects in an ideal world 1

---

### **01 An introduction to projects and project management 3**

Learning outcomes 3

Introduction 3

Projects – initial perspectives 4

The project manager and project management 6

Project management is risk management 7

Project processes 14

Projects and lifecycles 18

Projects and gates 20

Projects: ingredients and early insights 21

Projects are complex; stakeholders; change 24

Summary 27

Notes 27

References 28

### **02 Projects at the conceptual phase 30**

Learning outcomes 30

Introduction 30

Conceptual phase 31

Entry points 33

Some important questions 43

Who is asking for it? 45

Why do they want it? 50

What do they want? 50

When do they want it? 52

How much will it cost? 52

How will we do it? 52

What assumptions will be needed? What constraints will there be? 53

Summary 53

Note 54

**03 Planning within projects 56**

- Learning outcomes 56
- Introduction 56
- Stakeholder aspects 57
- Specification – being clear about what is required 58
- Breaking things down 59
- Time planning 60
- Resource planning 68
- Cost planning 71
- Quality planning 77
- Project management organization 78
- Summary 84
- Notes 84
- References 85

**PART TWO Projects in a real world 87**

---

**04 After the planning: delivering projects 89**

- Learning outcomes 89
- Introduction 89
- Delivering: more than plan conversion 90
- Working with stakeholders 92
- Delivering to specification 93
- Time and schedule management 96
- Resource management 100
- Cost and budget management 104
- The people part: delivering through the structure and team 108
- Summary 113
- Notes 113
- References 114

**05 Managing to completion 115**

- Learning outcomes 115
- Introduction 115
- Managing actively 116
- Completion challenges 129
- Summary 136
- Notes 137
- References 137

**06 Reviewing and learning in projects 138**

- Learning outcomes 138
- Introduction 138
- What we have learnt about the project so far 139
- Project review processes 141
- Were we successful? 146
- Incentives to succeed 152
- Summary 158
- Notes 159
- References 159

**PART THREE Projects in a challenging world 161**

---

**07 Projects: a way of thinking 163**

- Learning outcomes 163
- Introduction 163
- The practitioner world 164
- The context for projects-based organizations 170
- Projects create value 178
- Summary 182
- References 183

**08 Within and outside projects 185**

- Learning outcomes 185
- Introduction 185
- Aggregation within and outside projects 186
- Projects, programmes, portfolios 195
- Providing support – project management offices 204
- Summary 210
- Note 211
- References 211

**09 A global stage 213**

- Learning outcomes 213
- Introduction 213
- Many projects have international elements 214
- Culture, communication, commonalities 218
- Implications for project management 231
- Summary 235
- References 235

## **PART FOUR** Developing a capability 237

---

- 10 Managing and leading in project environments** 239  
Learning outcomes 239  
Introduction 239  
Managing and leading; distinct and complementary attributes 240  
Summary 259  
Note 259  
References 259
- 11 A spectrum of project management roles** 262  
Learning outcomes 262  
Introduction 262  
Teams in project environments 263  
A spectrum of roles 274  
Sector-specific project management roles 278  
Summary 285  
Notes 285  
References 286
- 12 Develop the capability** 287  
Learning outcomes 287  
Introduction 287  
Context 288  
Undertaking projects from a holistic perspective 289  
Delivering projects in a strategic style 292  
Project success factors 295  
What the future holds 298  
Summary 300  
Notes 300  
References 301
- Glossary* 302  
*Index* 308
