Foreword xiii

Abbreviations xv

Glossary xvii

01 Business and logistics 1

- 1.1 Business interfaces 1
- 1.2 Logistics goals and functions 2
- 1.3 Business logistics 4
 - 1.3.1 Procurement logistics 4
 - 1.3.2 Production logistics 7
 - 1.3.3 Distribution logistics 7
 - 1.3.4 Waste disposal logistics 9
- 1.4 Internal logistics 10
- 1.5 Business management logistics 10
 - 1.5.1 Key performance indicators 11
 - 1.5.2 Goals, strategies 13
- 1.6 Logistics and organizational structure 13
- 1.7 VDI guidelines 14
- 1.8 Examples and questions 14

02 Material flow logistics 26

- 2.1 Material flow functions 26
- 2.2 Division, allocation 27
- 2.3 Material flow components 30
 - 2.3.1 Technical and spatial component 30
 - 2.3.2 Quantitative component 31
 - 2.3.3 Time and organizational component 33
- 2.4 Material flow costs 34
- 2.5 Material flow analysis 34
 - 2.5.1 Causes 35
 - 2.5.2 Goal, task, process 35
 - 2.5.3 Capturing the material flow 36
 - 2.5.4 Analyse and depict material flow recordings 41
 - 2.5.5 Value stream design 43
 - 2.5.6 Identifying weaknesses and assessment 43

- 2.6 Material flow management 46
 - 2.6.1 Management data, goals, design principles 46
 - 2.6.2 Approach 48
- 2.7 VDI guidelines 49
- 2.8 Examples and questions 49

03 Cargo, packaging, loading unit 69

- 3.1 Cargo and storage goods 69
 - 3.1.1 Division 69
 - 3.1.2 Bulk cargo 69
 - 3.1.3 General cargo 72
 - 3.1.4 Transport, storage and loading equipment 73
- 3.2 Packaging 83
 - 3.2.1 Package, multi-pack 83
 - 3.2.2 Packaging types 84
 - 3.2.3 Waste and packaging disposal 84
- 3.3 Load unit, load, transport safety 86
 - 3.3.1 Logistical unit, load unit 86
 - 3.3.2 Load unit creation 88
 - 3.3.3 Palletizing, packing patterns, palletizer 89
 - 3.3.4 Transport safety for load units 91
 - 3.3.5 Pallet-free load unit 96
 - 3.3.6 Load assembly and safety 96
- 3.4 Planning of packaging and creation of load units 98
- 3.5 VDI guidelines, DIN standards 99
- 3.6 Examples and questions 99

04 Transport logistics basics 116

- 4.1 Internal transport 116
- 4.2 Transport logistics 116
- 4.3 Transport system, transport technology, transport chain 117
- 4.4 Internal means of transport 118
- 4.5 Power types 119
 - 4.5.1 Manual drive 119
 - 4.5.2 Gravity drive 119
 - 4.5.3 Combustion drive 120
 - 4.5.4 Electromotive drive 121
 - 4.5.5 Hybrid drive 124
 - 4.5.6 Electrical battery drive unit 124
 - 4.5.7 Hydraulic drive unit 128

- 4.6 Wheel, tyres, roadway 129
 - 4.6.1 Tyres and roadway 131
 - 4.6.2 Wheels for tracks 133
 - 4.6.3 Roadway, track 134
- 4.7 Dimensioning basics 134
 - 4.7.1 Basic terminology 136
 - 4.7.2 Force transfer through form and friction 137
 - 4.7.3 Transport good streams 139
 - 4.7.4 Engine design 140
- 4.8 Economy, investment, operating costs 142
- 4.9 Transport planning 145
 - 4.9.1 Aspects of transport planning 145
 - 4.9.2 Approach and implementation 147
- 4.10 VDI guidelines, DIN standards, recommendations 147
- 4.11 Examples and questions 148

05 Continuous conveyors 157

- 5.1 General 157
 - 5.1.1 Definition, advantages and disadvantages, deployment 157
 - 5.1.2 Division and sub-division 158
 - 5.1.3 Dimensioning basics 159
- 5.2 Continuous conveyors for bulk and general cargo 160
 - 5.2.1 General 160
 - 5.2.2 Belt conveyors 161
 - 5.2.3 Link belt conveyors 182
 - 5.2.4 Slides or downward pipes 183
- 5.3 Continuous conveyors for general cargo 185
 - 5.3.1 General 185
 - 5.3.2 Drag chain and transport chain conveyors 186
 - 5.3.3 Circular conveyors, power and free conveyors 187
 - 5.3.4 Roller conveyors, ball transfer tables 193
 - 5.3.5 Circulating conveyors 200
- 5.4 Continuous conveyors for bulk cargo 203
 - 5.4.1 General 203
 - 5.4.2 Bucket conveyors 203
 - 5.4.3 Scrapers and trough chain conveyors 209
 - 5.4.4 Transport with screws 213
 - 5.4.5 Vibrating conveyors 219
 - 5.4.6 Transport with air 230
- 5.5 Standards, guidelines, recommendations 236
- 5.6 Examples and questions 237

06	Discontinuous conveyors	260
6.1	Features, deployment, division	260
6.2	Lifting devices	260
6.2.1	Hydraulic ramps	261
6.2.2	Vertical conveyors	262
6.3	Electric monorails	262
6.4	Cranes	267
6.4.1	General, categorization	267
6.4.2	Travelling cranes (bridge cranes)	269
6.4.3	Portal cranes	271
6.4.4	Stacking crane	272
6.5	Track vehicles	273
6.5.1	Transfer and transfer lift cars	274
6.5.2	Storage and retrieval machines	275
6.6	Industrial trucks	275
6.6.1	Advantages and disadvantages, division	275
6.6.2	Selection criteria	276
6.6.3	Drive resistance	280
6.6.4	Manually operated industrial trucks	282
6.6.5	Tug tractors	285
6.6.6	Carts	286
6.6.7	Lift trucks	288
6.6.8	VDI guidelines	307
6.6.9	Examples and questions	307
6.7	Driverless industrial trucks: automated guided transport system	332
6.7.1	Advantages, deployment	332
6.7.2	Components of an inductive AGVS	333
6.7.3	VDI guidelines	344
6.7.4	Examples and questions	344
07	Handling logistics	356
7.1	General	356
7.2	Bulk handling	357
7.3	General cargo handling	358
7.3.1	Handling equipment	358
7.3.2	Handling area	359
7.3.3	Handling systems for loading units	364
7.3.4	Container and swap body handling	368
7.4	Aspects of planning the handling area	370

- 7.5 VDI guidelines 371
- 7.6 Examples and questions 371

08 Handling 388

- 8.1 Definition and task 388
- 8.2 Means of handling 388
 - 8.2.1 Handling devices to change quantity 389
 - 8.2.2 Handling devices to change location 390
 - 8.2.3 Handling devices in integrated deployment 391
- 8.3 Handling processes 391
- 8.4 Handling system and material flow 392

09 The basics of warehousing and order picking logistics 397

- 9.1 Warehousing, stock 397
- 9.2 Warehousing terminology, definitions 400
- 9.3 Warehouse organization, storage site allocation 404
- 9.4 Warehouse structure 407
 - 9.4.1 Goods receipt (GR) 408
 - 9.4.2 Transport systems 408
 - 9.4.3 Unit warehouse (UW) 409
 - 9.4.4 Order picking warehouse (OP) 409
 - 9.4.5 Goods issue (GI) 409
 - 9.4.6 Warehousing structure designs 410
- 9.5 Warehousing logistics 412
- 9.6 Warehousing costs 413
- 9.7 Terminology, key figures 415
- 9.8 Warehousing strategies 419
- 9.9 Examples and questions 419

10 Warehousing and shelving type 429

- 10.1 Bulk warehousing 429
 - 10.1.1 Bulk cargo floor storage 429
 - 10.1.2 Bulk container warehousing 429
 - 10.1.3 Filling and emptying of bunkers/silos 430
- 10.2 General cargo warehousing 431
 - 10.2.1 Storage methods, storage system, shelving types 431
 - 10.2.2 Floor storage 434
- 10.3 Self storage 435
 - 10.3.1 Shelving types for line storage 436

- 10.3.2 Shelving types for line/compact storage 442
- 10.3.3 Shelving types: compact storage 454
- 10.4 Means of transport for storage and retrieval 460
 - 10.4.1 Cranes 460
 - 10.4.2 Track-bound industrial trucks 461
 - 10.4.3 Industrial trucks 464

11 Order picking systems 468

- 11.1 Functions of the order picking process 468
 - 11.1.1 Provisioning items 468
 - 11.1.2 Moving the order picker 470
 - 11.1.3 Removing items 470
 - 11.1.4 Discharging items 471
- 11.2 Organizational structure and workflow management for order picking 471
 - 11.2.1 Workflow management 471
 - 11.2.2 Order picking techniques 471
 - 11.2.3 Organizational structure 476
- 11.3 Order picking time and performance 477
- 11.4 Manual order picking 481
 - 11.4.1 Order picking using transport 481
 - 11.4.2 Horizontal order picker 484
 - 11.4.3 Vertical order picker 484
- 11.5 Automatic order picking 485
- 11.6 Examples for unit and order picking warehouse systems 490
 - 11.6.1 Automatic small parts warehouse 491
 - 11.6.2 Extra-long goods storage 494
 - 11.6.3 Storage and retrieval levels 497
- 11.7 VDI guidelines 500
- 11.8 Examples and questions 501

12 Planning systematics and project management 532

- 12.1 Planning basics 532
 - 12.1.1 Tasks and meaning 532
 - 12.1.2 Planning reasons 532
 - 12.1.3 Types of planning 533
 - 12.1.4 Influencing factors 533
 - 12.1.5 Planning principles 534
- 12.2 Planning data 535

- 12.3 Planning systematics 537
 - 12.3.1 Iteration process 537
 - 12.3.2 Planning process 537
 - 12.3.3 Project management 538
- 12.4 Preliminary study 540
- 12.5 System planning 540
 - 12.5.1 Preparation for planning 540
 - 12.5.2 Analysis 541
 - 12.5.3 Approval 543
 - 12.5.4 System alternatives 543
 - 12.5.5 Assessment 544
 - 12.5.6 Decision 545
- 12.6 Implementation planning 545
- 12.7 Implementation 547
- 12.8 Project monitoring 548
- 12.9 Planning tools 549
 - 12.9.1 Coordination and information tools 549
 - 12.9.2 Methods for analysis 551
 - 12.9.3 Optimization processes 553
 - 12.9.4 Assessment and decision-making methods 556
 - 12.9.5 Presentation 560
 - 12.9.6 Presentation techniques 561
- 12.10 Factory planning basics 563
 - 12.10.1 Interior layout 563
 - 12.10.2 Development plan 564
 - 12.10.3 Site investigation 565
 - 12.10.4 Identifying solutions 568
 - 12.10.5 Computer-aided factory planning 568
 - 12.10.6 Fire prevention 570
- 12.11 Guidelines 577
- 12.12 Examples and questions 577
- Reference 602

13 Information logistics 603

- 13.1 Identification labels for general cargo 604
 - 13.1.1 Barcode technology 605
 - 13.1.2 Multi-dimensional barcode 609
 - 13.1.3 Arrangement of data labels 610
 - 13.1.4 Reading devices 610
 - 13.1.5 Mobile data storage 610
 - 13.1.6 RFID technology 611

13.2	Data transmission technology	614
13.2.1	Data transmission with induction technology	614
13.2.2	Data transmission with radio technology	615
13.2.3	Data transmission with infrared technology	617
13.3	Material flow management and administration	617
13.3.1	Offline operation	617
13.3.2	Online operation	618
13.3.3	Warehouse management system WMS/stacker control system	620
13.3.4	Configuration of a material flow–information flow system	623
13.3.5	Connecting a warehouse to IT	625
13.4	VDI guidelines	625
13.5	Examples and questions	625
